PROFILE

I'm a frontend developer with solid experience working with HTML, CSS, JavaScript, and React. I build responsive, functional interfaces and I'm comfortable taking a project from the design stage to a finished product. I pay attention to detail, write clean code, and make sure everything works smoothly across devices. I've handled real projects, solved problems under pressure, and I'm confident in my ability to deliver results and keep improving my skills.

EXPERIENCE

Community innovation hub, 5th avenue, Abesan estate — *Front end developer*

July 2025 - Present

I build and maintain user-facing features for web projects, turning design concepts into responsive and interactive interfaces. I collaborate with team members to improve UI/UX, optimize performance, and ensure clean, scalable code across projects. I also contribute ideas during planning, help troubleshoot issues, and take ownership of tasks from development to deployment.

EDUCATION

Baptist model highschool, Ikola— *Secondary school degree*

September 2022 - August 2025

Completed my secondary education with strong involvement in tech-related activities and leadership roles. I consistently balanced academics with personal development, building a foundation in problem-solving, collaboration, and digital creativity. My interest in technology and software development grew during this period, leading me to start working on personal projects and learning frontend development.

PROJECTS

Emotion Aware Daily Journal — *AI-powered journal web app*

SKILLS

Frontend Development:

HTML, CSS, JavaScript and React

Experienced in building responsive, user-focused interfaces with clean structure, reusable components, and interactive features.

LANGUAGES

English and Yoruba

URL: <https://emotion-journal-1.onrender.com/>

Tech: HTML, CSS, JavaScript (Frontend) | Python (Backend)
Developed a full-stack AI journal platform that analyzes users' emotions and recommends coping strategies for negative moods. Built the entire frontend from scratch and integrated the Python backend to handle emotion processing, user input, and feedback responses. Focused on usability, clean UI, and real-world mental wellness applications.

Personal Portfolio Website — *Static Frontend Showcase*

URL: <https://replicated-portfolio.netlify.app/>

Tech: HTML, CSS, JavaScript

Designed and developed a responsive portfolio website to highlight my projects and skills. Focused on layout, accessibility, animations, and clean structure. Optimized it for performance and cross-device viewing, with clear navigation and modern styling.

Language AI website — *Static Web Interface*

URL: <https://delightful-sable-f5b80d.netlify.app/>

Tech: HTML, CSS, JavaScript

Built a clean and interactive website interface for a language-based AI concept. Focused on user experience, layout responsiveness, and UI consistency. Structured the site to be easily scalable for future backend or AI integrations.
